EDUCATION

General Assembly
New York, NY

Software Engineer

University of North Texas
Denton, TX

Art History

PROFESSIONAL SUMMARY

Being a software engineer with a background in visual art, customer service, and business management provides me a unique opportunity to grow as a lifelong, continuous learner while living out my passion for finding creative solutions. I believe the best solutions are discovered by balancing a deep desire to understand how things work with a relentless inspiration to improve. I thrive in a fast-paced environment where I'm able to collaborate with a team to reach a shared vision. I bring passion to every project I work on – from learning new programming languages in my professional career to researching historical niche European films in my personal life.
